INDEX OF AUTHORS

AARDEN, L. — Lymphocyte activation 806
AARDEN, L.A. — See Van KOOTEN, C.
ACHSTETTER, T. — See REICHHART, J.-M.
ADACHI, M. and ISHIZAKA, K. — Possible role of IgD-binding factors in immune response 86
AICHER, W.K., McGHEE, J.R. and KIYONO, H. — Candidates for the mouse FcαR: β-galactosyl transferase, secretory component and a 38kDa protein 90
ALBERTINI, A. — See SOTTINI, A.
AMIN, A.R., COICO, R.F. and THORBECKE, G.J. — Characterization and regulation of T-cell IgD receptors and IgD-binding factor 94
ANDERSON, C.L. — See van de WINKEL, J.G.J.
ANDREU, J.L. — See FARO, J.
APTIKAEVA, G.E. — See BRONDZ, B.D.
AREVALO, M. — See MUNOZ, C.
ASHIDA, M. — The prophenoloxidase cascade in insect immunity 908
ASPAN, A. — See SÖDERHÄLL, K.
AUGUSTIN, A. and SIM, Gek-Kee — Positive selection and extrathymic expansion of γδ T cells 593
BAINES, M.G. and GENDRON, R.L. — Are both endogenous and exogenous factors involved in spontaneous foetal abortion? 154
BAND, H., PANCHAMOORTHY, G., McLEAN, J., MORITA, C.T., ISHIKAWA, S., MODLIN, R. and BRENNER, M.B. — Recognition of mycobacterial antigens by γδ T cells 645
BARCENA, A. — See TORIBO, M.L.
BASTIDE, J.-M. — See van de MOER, A.
BENKRIANE, M. — See DEVAUX, C.
BENVENISTE, J. — See DENIZOT, Y.
BIEWENGA, J. — See HAMELEERS, D.M.H.
BLOND-ELGUINDI, S. and GOLDBERG, M.E. — Conformational changes in the N-terminal domain of the *Escherichia coli* tryptophan synthase β_2 subunit induced by its interaction with monoclonal antibodies 879
BLUESTONE, J.E. and MATIS, L.A. — Are TCRαβ cells and TCRγδ cells that different? 606
BOLDUC, C., WATERFIELD, J.D. and DESLAURIERS, N. — Tissue distribution and cytofluorometric analysis of oral mucosal T cells in the BALB/c mouse 461
BOLHUIS, R.L.H., STURM, E., FISCH, P., SONDEL, P.M. and BRAAKMAN, E. — Human γδ T lymphocytes subjects: activation by superantigen? 658
BONNEVILLE, M. — See LEFRANC, M.-P.
BORN, W. and O'BRIEN, R. — The γδ cell response to stress: unresolved issues and possible significance 595
BORST, J. and Van DONGEN, J.J.M. — Repertoire selection of human γδ T cells 663
BOTTINO, C. — See MORETTA, A.
BOUCRAUT, J. — See DEVAUX, C.

BRAAKMAN, E. — See BOLHUIS, R.L.H.
BRAU BRETON, C., ROSENBERRY, T.L. and PEREIRA da SILVA, L.H. — Glycolipid anchorage of *Plasmodium falciparum* surface antigens 745
BREDFELDT, G. — See HANSEN, H.
BREHÉLIN, M. — Depression of immune reaction in insects 935
BRENER, Z. — See GAZZINELLI, R.T.
BRENNER, M.B. — See BAND, H.
BREZIN, C. — See CHAOUAT, G.
BRONDZ, B.D., OSIPOVA, T.V., APTIKAEVA, G.E. and KRONIN, V.V. — Difference between antigen-binding receptor repertoires in effector cytotoxic T lymphocytes and their secondary precursors (memory cells) specific to H-2K^b. 43
BRUYNS, C. and JEENER, R. — Relationship between the synthesis of autoimmune antibodies and the formation of clusters of B, T and APC cells during the syngeneic mixed lymphocyte reaction in BALB/c and NZB mice: a technique for isolation of the spleen autoimmune compartment of non-immunized pathogen-free mice 491
CANÇADO, J.R. — See GAZZINELLI, R.T.
CANTRELL, D.A. — Signal transduction 797
CAPRON, A., DESSAINT, J.-P. and CAPRON, M. — FcεRII and IgE-dependent activation of inflammatory cells 99
CAPRON, M. — See CAPRON, A.
CARDING, S.R. — A role for γ/δ T cell in the primary immune response to influenza virus 603
CARDOSO, J.E. — See GAZZINELLI, R.T
CASORATI, G. and MIGONE, N. — The TCR Vδ repertoire and the restricted TCR V gene expression and pairing 624
CASTEELS, P. — Possible applications of insect antibacterial peptides 940
CEREDIG, R. — Mouse foetal thymus development 286
CESAR, E. — See CLÉMENT, M.-V.
CHANTOME, R. — See MARCELLI-BARGE, A.
CHAOUAT, G, MENU, E., KINSKY, R. and BREZIN, C. — Immunologically mediated abortions: one or several pathways? 188
CHAOUAT, G. and WEGMANN, T. — The immunology of spontaneous abortion. Introduction 153
CHAOUAT, G. — See SZEKERES-BARTHO, J.
CHARLEY, B. and LAVENANT, L. — Characterization of blood mononuclear cells producing IFNα following induction by coronavirus-infected cells (porcine transmissible gastroenteritis virus) 141
CHERMANN, J.-C. — See DEVAUX, C.
CHERNIAK, R. — See van de MOER, A.
CHIU, C.-P. — See ZLOTNIK, A.
CICCONE, E. — See MORETTA, A.
CLARK, D.A — Are there immune abortions? 202
CLÉMENT, M.-V., HADDAD, P., SOULIÉ, A., LEGROS-MAIDA, S., GUILLET, J., CESAR, E. and SASPORTES, M. — Involvement of granzyme B and perforin gene expression in the lytic potential of human natural killer cells 477
COBBOLD, S. — Peripheral tolerance 801
COHEN, D.I. — See de VILLARTAY, J.-P.
COLLEY, D.G. — See GAZZINELLI, R.T.
COLOMBANI, J. — See MARCELLI-BARGE, A.
CORBEAU, P. — See DEVAUX, C.
CORCOS, D. — Oncogenic potential of the B-cell antigen receptor and its relevance to heavy chain diseases and other B-cell neoplasias: a new model 543
COUTINHO, A. — See NARDI, N.B.
CRESPEAU, H. — See ROCHU, D.
CROFT, M. — See SWAIN, S.L.

CROW, M.K. and FRIEDMAN, S.M. — Cognate T helper cell, B cell interaction in man 427
CROY, B.A. and SUMMERLEE, A.J.S. — Intracerebroventricular administration of a single small dose of hrIL-1β is sufficient to initiate murine pregnancy failure 195
DeBENEDETTE, M. — See Snow, E.C.
DELESPESSE, G. and SARFATI, M. — IgE-binding factors (soluble CD23) and IgE regulation 75
DEMBIĆ, Z. and VIDOVIĆ, D. — Specificity and function of Qa-1 restricted γδ T cells 600
DENIZOT, Y. RAIBAUD, P. DUCLUZEAU, R., LADIRÉ, M., THOMAS, Y. and BENVENISTE, J. — Modulation of gut wall paf-acether and precursors by intestinal microflora 235
DENNING, S.M. — See LE, P.T.
DENT, A. — See HEDRICK, S.M.
DESCHAMPS, I. — See MARCELLI-BARGE, A.
DESLAURIERS, N. — See BOLDUC, C.
DESSAINT, J.-P. — See CAPRON, A.
DEVAUX, C., BOUCRAUT, J., POIRIER, G., CORBEAU, P., REY, F., BENKRIANE, M., PERARNAU, B., KOURILSKY, F. and CHERMANN, J.-C. — Anti-β_2-microglobulin monoclonal antibodies mediate a delay in HIV1 cytopathic effect on MT4 cells 357
DINARELLO, C. — See MUNOZ, C.
DIU, A. — See THÈZE, J.
DUCLUZEAU, R. — See DENIZOT, Y.
DUESBERG, P.H. — AIDS: non-infectious deficiencies acquired by drug cinsumption and other risk factors 5
DUVIC, B. — See SÖDERHÄLL, K.
ENDRES, S. — See MUNOZ, C.
FARO, J., MARCOS, M.A.R., ANDREU, J.L., MARTINEZ-A., C. and COUTINHO, A. — Inside the thymus, Mls antigen is exclusively presented by B lymphocytes 725
FAYE, I. — Acquired immunity in insects:. the recognition of nonself and the subsequent onset of immune protein genes 927
FINE, A. — See ROCHU, D.
FINE, J.-M. — See ROCHU, D.
FISCH, P. — See BOHLUIS, R.L.H.
FREITAS, A.A. — See NARDI, N.B.
FRIDMAN, W.H. and SAUTÈS, C. — Fcγ receptors (FcγR) and IgG-binding factors (IgG-BF): their relationships 60
GANE, P. — See ROCHU, D.
GARRIGUES, M.L. — See van de MOER, A.
GATRILL, A.J., MUNK, M.E. and KAUFMANN, S.H.E. — Gamma/delta T cells and bacteria 641
GAZZINELLI, G. — See GAZZINELLI, R.T.
GAZZINELLI, R.T., GAZZINELLI, G., CANÇADO, J.R., CARDOSO, J.E., BRENER, Z. and COLLEY, D.G. — Two modes of idiotypic stimulation of T lymphocytes from patients with Chagas's disease: correlations with clinical forms of infection 759
GENDRON, R.L. — See BAINES, M.G.
GÖTZ, P. — See RATCLIFFFE, N.A.
GOLDBERG, M.E. — See BLOND-ELGUINDI, S.
GORIDIS, C. — Cell adhesion 798
GROH, V. and STROMINGER, J.L. — Developmental biology of T cells expressing the γδ T-cell receptor 685
GROUX, H. and GYSIN, J. — Opsonization as an effector mechanism in human protection against asexual blood stages of *Plasmodium falciparum*: functional role of IgG sublasses 529

GUILLET, J. — See CLÉMENT, M.-V.
GUTIÉRREZ-RAMOS, J.C. — See TORIBO, M.L.
GYSIN, J. — See GROUX, H.
HADDAD, P. — See CLÉMENT, M.-V.
HAMELEERS, D.M.H., ven der VEN, I., SMINIA, T. and BIEWENGA, J. — Anti-TNP-forming cells in rats after different routes of priming with TNP-LPS followed by intranasal boosting with the same antigen 515
HANSEN, H., BREDFELDT, G., HAVSTEEN, B., and H. LEMKE — Protein kinase activity of the intracellular but not of the membrane-associated form of the KI-1 antigen (CD30) 13
HAVSTEEN, B. — See HANSEN, H.
HAYDAY, A. — See KYES, S.
HAYNES, B.F. — See LE, P.T.
HEDRICK, S.M. and DENT, A. — A model for γδ T-cell development: rearranged γ- and δ- chain genes incorporated into the germline of mice .. 588
HEIN, W.R. — See MACKAY, C.R.
de la HERA, A. — Interleukins in development: is that beyond our control? 265
HODGKIN, P.D. — See KEHRY, M.R.
HOFFMANN, D. and HOFFMANN, J.A. — Cellular and molecular aspects of insect immunity. Introduction 895
HOFFMANN, D. — See HOFFMANN, J.A.
HOFFMANN, G.W. — A response to P.H. Duesberg with reference to an idiotypic network model of AIDS immunopathogenesis 703

INDEX OF ARTICLES PUBLISHED

AIDS: non infectious deficiencies acquired by drug consumption and other risk factors, P.H. DUESBERG 5
Protein kinase activity of the intracellular but not of the membrane-associated form of the KI-1 antigen (CD30), H. HANSEN, G. BREDFELDT, B. HAVSTEEN and H. LEMKE 13
An anti-*Cryptococcus neoformans* monoclonal antibody directed against galactoxylomannan, A. van de MOER, S.L. SALHI, R. CHERNIAK, P. PAU, M.L. GARRIGUES and J.-M. BASTIDE 33
Difference between antigen-binding receptor repertoires in effector cytotoxic T lymphocytes and their secondary precursors (memory cells) specific to H-2K^b, B.D. BRONDZ, T.V. OSIPOVA, G.E. APTIKAEVA and V.V. KRONIN 43
Fc-γ receptors (FcγR) and IgG-binding factors (IgG-BF): Their relationships, W.H. FRIDMAN and C. SAUTES 60
Biological functioning of human IgG Fc receptors, J.G.J. van de WINKEL and C.L. ANDERSON 64
Structure and expression of cloned Fcγ receptors, K.W. MOORE and D.-H. HSU 68
IgE-binding factors (soluble CD23) and IgE regulation, G. DELESPESSE and M. SARFATI 75
Role of the low-affinity Fc receptor in B-lymphocyte antigen presentation, M.R. KEHRY and L.C. YAMASHITA 77
Human FcεRII and IgE-binding factor: triangular network with IL-2 and IL-4, T. KAWABE, Y. MAEDA, M. TAKAMI and J. YODOI 82
Possible role of IgD-binding factors in immune response, M. ADACHI and K. ISHIZAKA 86
Candidates for the mouse Fcα R: β-galactosyl transferase, secretory component and a 38-kDa protein, W.K. AICHER, J.R. MCGHEE and H. KIYONO 90
Characterization and regulation of T-cell IgD receptors and IgD-binding factor, A.R. AMIN, R.F. COICO and G.J. THORBECKE 94
FcεRII and IgE-dependent activation of inflammatory cells, A. CAPRON, J.-P. DESSAINT and M. CAPRON 99
Marked shortage of C4B DNA polymorphism among insulin-dependent diabetic patients, A. MARCELLI-BARGE, J.C. POIRIER, R. CHANTOME, I. DESCHAMPS, J. HORS and J. COLOMBANI 117
The MHC class II deficiency syndrome: heterogeneity at the level of the response to 5-azadeoxycytidine, M. LAMBERT, M.C.J.A. van EGGERMOND, M.E.M. KRAAKMAN, R.K.B. SCHUURMAN and P.J. van den ELSEN 129
Characterization of blood mononuclear cells producting IFNα following induction by coronavirus-infected cells (porcine transmissible gastroenteritis virus), B. CHARLEY and L. LAVENANT 141
Are both endogenous and exogenous factors involved in spontaneous foetal abortion? M.G. BAINES and R.L. GENDRON 154

Interruption of murine pregnancy by activation of antigen-non-specific killer cells in the endometrium with indomethacin, high dose IL-2 or a combination, P.K. LALA 159
Possible mediators in endotoxin-induced abortion, M. PARANT 164
Are there immunologically mediated abortions? If so, which mechanisms? C.W.G. REDMAN 169
Progesterone-mediated immunosuppression and the maintenance of pregnancy, J. SZEKERES-BARTHO, P. VARGA, R. KINSKY and G. CHAOUAT 175
Non-specific immunopotentiation and pregnancy loss, V. TODER and D. STRASSBURGER 181
The role of cytokine cross talk in preventing abortion, T. WEGMANN 185
Immunologically mediated abortions: one or several pathways? G. CHAOUAT, E. MENU, R. KINSKY and C. BREZIN 188
Intracerebroventricular administration of a single small dose of hrIL-Aβ is sufficient to initiate murine pregnancy failure, B.A. CROY and J.S. SUMMERLEE 195
Are there immune abortions? D.A. CLARK 202
Immunological factors in human abortion, F. MOWBRAY 207
Modulation of gut wall paf-acether and precursors by intestinal microflora, Y. DENISOT, P. RAIBAUD, R. DUCLUZEAU, M. LADIRÉ, Y. THOMAS and J. BENVENISTE 235
Receptors for IgA and IgE on T and B lymphocytes: development, regulation and function, R.G. LYNCH, M. SANDOR and T.J. WALDSCHMIDT 241
Molecular genetics and biology of two different species of FcεRII, H. KIKYTANI and T. KISHIMOTO 249
Immune-associated abortion: human vs mouse model, V. TODER and D. STRASSBURGER 259
On «the immunology of spontaneous abortion», J. SZEKERES-BARTHO 261
Interleukins in development: is that beyond our control? A. de la HERA . 265
Cytokines and development, A. ZLOTNIK, C.-P. CHIU and R. MURRAY 268
Thymic epithelial-cell-derived cytokines and their roles in thymic precursor cell differentiation, P.T. LE, S.M. DENNING, B.F. HAYNES and K.H. SINGER 271
Thymic accessory cells, cytokines and thymocyte activation, M. PAPIERNIK 275
Interleukins and T-cell development in the thymus, K. SHOETMAN and PETRIE, H.T. 280
Mouse foetal thymus development, R. CEREDIG 286
Developmental shifts in signaling pathways for lymphokine production and growth response, E.V. ROTHENBERG 289
Precursor thymocytes follow an IL-2/IL-2 receptor-dependent pathway of differentiation, J.C. ZÚÑIGA-PFLÜCKER and A.M. KRUISBEEK 293
The original sin of T cells: constitutive activation of the IL-2/IL-2R pathway early in intrathymic development, M.L. TORIBIO, M.J. SÁNCHEZ, J.C. GUTIÉRREZ-RAMOS, J.L. de la POMPA, E. LEONARDO, A. BÁRCENA and C. MARTINEZ-A 298
Multiple-antigen-mediated autoimmunity (MAMA) in AIDS: a possible model for postinfectious autoimmune complications, R.S. ROOT-BERNSTEIN ... 321
Interleukin-6 enhances human Ig production, but not as a terminal differentiation factor for B lymphocytes, C. van KOOTEN, M.H.J. van OERS and L.A. AARDEN 341
Anti-β-microglobulin monoclonal antibodies mediate a delay in HIV1 cytopathic effect on MT4 cells, C. DEVAUX, J. BOUCRAUT, G. POIRIER, P. CORBEAU, F. REY, M. BENKRIANE, B. PERARNAU, F. KOURILSKY and J.-C. CHERMANN 357
ABO-blood-groupe-related idiotypic network: mimicry of oligosaccharide epitope by rabbit antiidiotypic antibodies to murine monoclonal anti-A antibody, D. ROCHU, H. CRESPEAU, A. FINE, P. GANE, P. ROUGER, C. SALMON and J.-M. FINE 373

Positive and negative immunoregulation through CD4 depends on the concentration of the specific ligand and on the state of activation of the responding cells, A. Sottini, A. Albertini, D. Primi and L. Imberti 389
Delivery of the major growth stimulus to resting B cells, E.C. Snow, M. Debenedette and K.E. Pollok 408
Contact-dependent B-cell activation by helper T cells, L.S. Marshall and R.J. Noelle 412
Cellular contact as a component of signaling during cognate T/B interactions, T. Owens 417
B-cell proliferation and differentiation mediated by Th-cell membranes and lymphokines, M.R. Kehry, L.C. Yamashita and P.D. Hodgkin 421
The induction of human B-cell activation, proliferation and differentiation by anti-CD3-stimulated T cells – A model of T cell/B cell collaboration, P.E. Lipsky 424
Cognate T helper cell/B cell interaction in man, M.K. Crow and S.M. Friedman 427
Critical role of cognate interactions in the response of small, high-density B cells, S.L. Swain and M. Croft 431
Control of B-cell activation by T-cell lymphokines, J. Theze and A. Diu . 440
A postulated role for the detection of bystander resting B-cell differentiation, M.H. Julius 443
Tissue distribution and cytofluorometric analysis of oral mucosal T cells in the BALB/c mouse, C. Bolduc, J.D. Waterfield and N. Deslauriers ... 461
Involvement of granzyme B and perforin gene expressuin in the lytic potential of human natural killer cells, M.-V. Clement, P. Haddad, A. Soulie, S. Legros-Maida, J. Guillet, E. Cesar and M. Sasportes 477
Relationship between the synthesis of autoimmune antibodies and the formation of clusters of B, T and APC cells during the syngeneic mixed lymphocyte reaction in BALB/c and NZB mice: A technique for isolation of the spleen autoimmune compartment of non-immunized pathogen-free mice, C. Bruyns and R. Jeener 491
Interleukin-1β in human colostrum, C. Munoz, S. Endres, J. van der Meer, L. Schlinger, M. Arevalo and C. Dinarello 505
Anti-TNP-forming cells in rats after different routes of priming with TNP-LPS followed by intranasal boosting with the same antigen, D.M.H. Hameleers, I. van der Ven, T. Sminia and J. Biewenga 515
Opsonization as an effector mechanism in human protection against asexual blood stages of *Plasmodium falciparum:* functional role of IgG subclasses, H. Groux and J. Gysin 529
Oncogenic potential of the B-cell antigen receptor and its relevance to heavy chain diseases and other B-cell neoplasias: a new model, D. Corcos .. 543
Genetic organization of the human T-cell receptor γ and δ loci, M.-P. Lefranc and T.H. Rabbitts 565
Disparate types of γδ T cell, S. Kyes and A. Hayday 582
A model for γδ T-cell development: rearranged γ- and δ-chain genes incorporated into the germline of mice, S.M. Hedrick and A. Dent 598
Positive selection and extrathymic expansion of γδ T cells, A. Augustin and G.K. Sim 593
The γδ cell response to stress: unresolved issues and possible significance, W. Born and R. O'Brien 595
Specificity and function of Qa-1 restricted γδ T cells, Z. Dembic and D. Vidovic 600
A role for γ/δ T cells in the primary immune response to influenza virus, S.R. Carding 603
Are TCRαβ cells and TCRγδ cells that different?, J.A. Bluestone and L.A. Matis 606

Analysis of γδ T cells in ruminants reveals further heterogeneity in γδ T-cell features and function among species C.R. MACKAY and W.R. HEIN ... 611
A nomenclature to fit the organization of the human T-cell receptor γ and δ genes, M.-P. LEFRANC and T.H. RABBITTS 615
Gene regulation within the TCR-α/δ locus by specific deletion of the TCR-δ cluster, J.-P. de VILLARTAY and D.I. COHEN 618
The TCR Vδ repertoire and the restricted TCR V gene expression and pairing, G. CASAROTI and N. MIGONE 624
γ/δ T cell: from controlled development to functional programs, F. TRIEBEL 626
Human T lymphocytes expressing TCR gamma/delta, A. MORETTA, C. BOTTINO, D. PENDE, G. TRIPOLI, A.M. ORENGO, R. MILLO, P.G. PELICCI, E. CICCONE and L. MORETTA 630
Analysis of antigen specificity of human TCR γδ+ T cells, H. SPITS, H. YSSEL and J.E. de VRIES 636
Gamma/delta T cells and bacteria, A.J. GATRILL, M.E. MUNK and S.H.E. KAUFMANN 641
Recognition of mycobacterial antigen by γδ T cells, H. BAND, G. PANCHAMOORTHY, J. MCLEAN, C.T. MORITA, S. ISHIKAWA, R. MODLIN, and M.B. BRENNER 645
Potential role of γδ T cells in autoimmune diseases, J. HOLOSHITZ 651
Human γδ T lymphocyte subsets: activation by superantigens?, R.L.H. BOLHUIS, E. STURM, P. FISCH, P.M. SONDEL and E. BRAAKMAN 658
Repertoire selection of human γδ T cells, J. BORST and J.J.M. van DONGEN 663
γδ T cells in coeliac disease, C. RUST, S. PEÑA, P. KLUIN and F. KONING .. 668
Developmental biology of T cells expressing the γδ T-cell receptor, V. GROH and J.L. STROMINGER 685
γδ T cells: research on the frontlines of defence, C.A. JANEWAY Jr. 688
A response to P.H. Duesberg with reference to an idiotypic network model of AIDS immunopathogenesis, G.W. HOFFMANN 703
Selection of anti-F protein B-cell repertoires in normal mice, N.B. NARDI, A.A. FREITAS and A. COUTINHO 713
Inside the thymus, Mls antigen is exclusively presented by B lymphocytes, J. FARO, M.A.R. MARCOS, J.L. ANDREU, C. MARTINEZ-A. and A. COUTINHO 725
C4AQO and HLA-DR2, risk factors in multiple sclerosis, A. MARCELLI-BARGE, J.C. POIRIER, R. CHANTOME, V. LEPAGE, I. KHALIL and J. COLOMBANI . 741
Glycolipid anchorage of *Plasmodium falciparum* surface antigens, C. BRAUN BRETON, T.L. ROSENBERRY and L.H. PEREIRA da SILVA 745
Two modes of idiotypic stimulation of T lymphocytes from patients with Chagas'disease: correlation with clinical forms of infection, R.T. GAZZINELLI, G. GAZZINELLI, J.R. CANCADO, J.E. CARDOSO, Z. BRENER and D.G. COLLEY 759
Immunohistochemical study of bovine lymph nodes with antibodies against S100 protein subunits: comparison between lymph nodes of healthy and *Mycobacterium-paratuberculosis*-infected cattle, E. MONOTANI, T. YOSHINO, Y. ISHIKAWA and Y. NAKAJIMA 773
The Niels Jerne lecture, Why does the exposure to allogeneic cells sometimes lead to immunization and sometimes not? J.J. van ROOD 785
European Network of Immunology Institute Conference, Les Embiez, May 1990. *Summary of sessions* 797
Non-HIV immunosuppressive factors in AIDS: a multifactoral, synergistic theory of AIDS aetiology, R.S. ROOT-BERNSTEIN 815
Role of major and minor histocompatibility antigens in the suppression of alloreactive cytotoxic responses induced by alloantigen, G. PRZEWLOCKI and C. LECLERC 839
A novel approach to the induction of specific cytolytic T cells *in vivo*, V. LEY, C. ROTH, P. LANGLADE-DEMOYEN, E.L. LARSSON-SCIARD and P. KOURILSKY 855

Synergy between activated *Leishmania major*-specific CD4+ T lymphocytes and bone-marrow-derived cells in the exacerbation of murine cutaneous leishmaniasis, S.C.F. MENDONCA, R.G. TITUS and J.A. LOUIS 865
Conformational change in the N-terminal domain of the *Escherichia coli* tryptophan synthase β_2 subunit induced by its interactions with monoclonal antibodies, S. BLOND-ELGUINDI and M.E. GOLDBERG 879
The proPo-system and associated proteins: role in cellular communication in arthropods, K. SÖDERHÄLL, A. ASPAN and B. DUVIC 896
The prophenoloxidase cascade in insect immunity, M. ASHIDA 908
The inducible antibacterial peptides of dipteran insects, J.A. HOFFMANN and D. HOFFMANN 910
Functional studies on insect haemocytes, including non-self recognition, N.A. RATCLIFFE and P. GÖTZ 919
Transplantation immunity in insects: does allograft responsiveness exist? R.D. KARP 923
Acquired immunity in insects: the recognition of non-self and the subsequent onset of immune protein genes, I. FAYE 927
Inducible humoral immunity in insects: does an antibody-like response exist in invertebrates? R.D. KARP 932
Depression of immune reactions in insects, M. BREHÉLIN 935
Dual functions of insect immunity proteins in defence and development, S. NATORI 938
Possible applications of insect antibacterial peptides, P. CASTEELS 940
Expression and secretion of insect immune peptides in yeast, J.-M. REICHHART and T. ACHSTETTER 943
